### RFID Asset Tracking: Intelligentz And Media Recovery Partner To Deliver RFID Asset Tracking 8/31/2007

Intelligentz is proudly working with Media Recovery to sell Intelligentz's RFID Asset and Tracking solutions. The partnership will allow Intelligentz to reach small to large ranking companies in the financial industry as well as Media Recovery's global client base. Media Recovery represents two thirds of the fortune 100 companies and over half of the fortune 1000 corporations for over 30 years.

"Intelligentz's RFID solution has integrated naturally with our other vendors as well as our client's existing asset, personnel and identity tape tracking management systems," said Michael Moore, Media Recovery's National Technology Sales Manager. "We can now commit to being the first in the marketplace utilizing both active and passive RFID technologies."

"This partnership ensures the sale of our products as a consolidated solution into datacenters on a global basis," said Al Franklin, Intelligentz's SecurLynx President.

Intelligentz RFID solution is now part of DatacenterTrak , Media Recovery's RFID Asset Tracking package. DatacenterTrak is the most innovative RFID-based asset tracking and data protection solution available, specifically designed to help companies take proactive steps to prevent the potentially devastating losses caused by incidents involving lost, stolen, or misplaced data or equipment.

With Intelligentz's RFID system, Media Recovery is now offering multiple, customizable RFID data protection solutions for all types of Datacenters and equipment. Complete configuration consulting, on-site evaluations, software integration, and installation services are also offered.

#### AssetTrak:

Track, monitor, and record authorized and unauthorized equipment movements at all times, in every location. Maintain strict security throughout your facility. Receive up-to-the-minute alerts and notifications in the event of any unauthorized equipment movement. Detect tampering, temperature changes, radiation, vibration, motion, toxins, and gas leaks with optional sensor configurations.

#### Inventory TapeTrak:

Deter theft with RFID technology integrated into the volser bar code labels of individual tapes. Employ customizable hardware and software solutions to easily locate lost, misplaced, or misfiled tapes. Accelerate tape inventory audits. Reduce costs associated with outdated and inefficient inventory

## RFID White Papers And Case Studies

### Find RFID Solutions

- RFID Tags
- RFID Active Tags
- RFID Passive Tags
- Pre-programmed RFID Tags
- DoD RFID Tags
- EPC RFID Tags
- RFID Antennas
- RFID Applicators
- RFID Asset Tracking
- RFID Evaluation Kits
- RFID Infrastructure
- RFID Mandates
- RFID Middleware
- RFID Portals
- RFID Printers
- RFID Readers
- RFID Servers
- RFID Smart Labels
- RFID Software
- RFID Training

methods. Demonstrate real-time data cartridge control. Maintain strict compliance with all third-party requirements.

#### ContainerTrak:

Track every container with "linking technology" that associates individual tapes with specific transport cases and containers. Identify and track data transport container locations in real time. Record every tape and container entry or exit from secured areas. Provide comprehensive monitoring and control of all data cartridges and maintain compliance with all regulatory requirements.

#### Off-site TapeTrak:

Capture real-time data tape and container arrival and departure information as tapes enter and exit off-site storage facilities. Secure your data tapes at multiple locations. Monitor, track, and record tape container arrival and departure data in real time.

#### PeopleTrak:

Achieve real-time location status on all staff and visitors in your facility. Monitor, record, and track employees with multiple ID badge and identification options, including hands-free and on-board biometric (fingerprint) capabilities. Automatically open doors by linking to your current, legacy access control system, successfully controlling access to all secured areas in your facility. Designate "authorized escorts" for your equipment. Ensure reliable "chain of custody links."

#### Media Recovery Re-labeling Services:

To implement DatacenterTrak, it will be necessary to convert your tape library to this new RFID label system. For your convenience, Media Recovery offers tape re-labeling services as part of our turnkey solutions.

#### About Intelligentz

*Intelligentz has gained a tremendous amount of credibility and traction in the marketplace since the issuance of parent company Unisone Corporation's intellectual property portfolio spanning across 32 countries in February of 2006. Pangaea Systems was acquired by Intelligentz in 2005, the assets of TradeMotion Software and Parts.com's were acquired in January of 2007, and most recently SecurLynx in May of 2007 which when combined with the Unisone Patent has become an integral part in Intelligentz's overall growth. The company's flagship inventory management and RFID automation software enables businesses to tag, track, and manage their personnel and assets with real-time monitoring. Businesses become more efficient by providing dynamic visibility up and down the supply chain and through their day to day operations, thereby improving inventory data collaboration and accountability. For more information, visit [www.intelligentz.net](http://www.intelligentz.net).*

#### About Media Recovery

*Media Recovery has grown to become a major industry player with over 5 national distribution centers and a national sales force; a long way from their initial operation in an 800 square foot warehouse in Dallas, Texas in 1974. Our customers include such companies as Pfizer, Kmart, JP Morgan Chase, GAP, EDS, Exxon/Mobil Oil, The Limited, Fidelity Investments, Western Geophysical, Sprint, AT&T, Verizon, Dreamworks, and IBM. We are a leading distributor of products from*

*Avocent, APC, Fujifilm, IBM, Maxell, Sony, HP, NER Data Products, and Imation. Media Recovery has been designing effective Datacenter solutions for the unique needs of customers for over 30 years.*
