Environmental Initiatives at DataSpan

At DataSpan, we're dedicated to increasing our customers' efficiency levels and reducing their environmental impact. Our commitment to environmental preservation runs deep, and we know it's a priority we share with many of our customers. We drive energy efficiencies that generate savings we can pass on to you. We take steps to minimize our carbon footprint in order to be a provider you can feel good about choosing. And we invite you to share in our effort.

Green Products

All of our products show evidence of our attention to environmental impact. We consider every aspect of product design and performance, from the materials we choose to the disposal of used packaging materials. Our product line features:

- High-efficiency datacenter floor tiles
- Air blocks
- Filler panels
- Power and cooling audits and products
- Energy audits and monitors
- Hot aisle / cold aisle partition products
- High-efficiency HVAC systems
- Energy-efficient PDUs
- Datacenter cleaning programs
- 100% recycled certified media products
- 100% recycled replacement toner and ink cartridge products
- Recycled packaging materials

Green Facilities

Our facilities are designed for optimal energy efficiency, both on the plant floor and in the offices. The buildings feature:

- Programmable thermostats
- Enhanced insulation
- Energy-efficient lighting
- Energy-efficient HVAC system
- ENERGY STAR-rated appliances and computer equipment
- Fully implemented energy-saving processes and procedures
- Recycled office paper and electronic products

Green Future

At DataSpan, we're always looking for opportunities to increase our energy efficiency and reduce our carbon footprint. Our plans for further development include:

- Increased usage of recycled packaging
- Installation of water filtration system and discontinuation of bottled water
- Recycling of aluminum, glass and plastic bottles
